CYBER SECURITY

Are you a Small to Medium Business (SMB) operating in Victoria and wondering what your Cyber Security risk would look like?

We are seeking SMB's who would like to participate in a Cyber Security Risk analysis project in Victoria that is supported by TITAB, Microsoft, ADTIA, Victorian TAFE's, NAB and the Victorian State Government.

CITT, parent company of TITAB, have been funded by the Victorian Government to support Victorian Business with identifying basic Cyber Risks to their operations. This project will provide access to Cyber VET students to support businesses needing to undertake an initial analysis of the cyber security risks to the business.

The aim of the Cyber Security Project is to address both the cyber risks in small to medium business cyber and improve the security skills shortage currently experienced in Victoria. With the assistance of the TAFEs students undertaking the Cyber Security Courses this will provide them with the practical demonstration of cyber security skills in the workplace.

We know your time is precious, but so is your business data, if you can spare a few hours over 2 days then *please nominate your business to participate in this important project*.

Please send your details: name, business name, email address and contact number to:
gabrieleg@citt.com.au
or
alanf@citt.com.au

We will send you more details on the project once you have nominated. We look forward to working with you.

Gabriele Giofre and Alan Foster
CITT
